

	Beginning	Developing	Effective	Embedded
Science of Learning (SoL)	I don't yet understand the principles of the Science of Learning (SoL).	I am <b>starting to understand</b> the SoL principles (e.g. working memory, cognitive load theory, explicit instruction, gradual release of responsibility, etc.).	I have a <b>good understanding</b> of the SoL principles.	I can <b>support my colleagues</b> in understanding the SoL principles and <b>share</b> with them <b>proven</b> and <b>impactful</b> teaching strategies and practices.
	I am not sure what the SoL might look like and sound like in a classroom.	I am <b>starting to build</b> a kete of teaching strategies and practices that support the SoL principles.	I have a <b>growing kete</b> of teaching strategies and practices that reflect the SoL and I am <b>making changes</b> to how I plan, teach and assess.	I ensure any changes made to my practice are <b>proven</b> strategies based on sound research including the SoL.
		I am <b>reflecting on my own practice</b> in relation to the SoL	I can <b>talk about</b> how the changes I am making to my practice are based on the SoL <b>principles</b> and the <b>GROW Literacy tools</b> (e.g. GROW Literacy Lesson Sequence	I can <b>justify</b> the improvements I am making to my practice in reference to <b>SoL theories.</b>
	I am beginning	I am developing	I am effective	I have embedded practice
Science of Reading (SoR)	I don't yet understand the principles of the Science of Reading (SoR).	I am <b>starting to understand</b> the SoR research and some of the essential components within a structured approach to literacy (e.g. scope and sequence, explicit teaching, diagnostic assessment etc.).	I have a <b>good understanding</b> of the SoR <b>research</b> and the different <b>literacy elements</b> within a structured approach to literacy (e.g. oral language, systematic synthetic phonics teaching and knowledge, fluency, vocabulary, handwriting, comprehension etc.).	I can support my colleagues in understanding the SoR and <b>share</b> with them <b>proven</b> and <b>impactful</b> teaching strategies and practices.
	I am not sure what the SoR might look like and sound like in an effective literacy programme.	I am <b>starting to build</b> a kete of teaching strategies and practices that support a structured approach to literacy.	I have a <b>growing kete</b> of teaching strategies and practices that make up a structured approach to literacy and I am <b>making changes</b> to how I plan, teach and assess.	I ensure any changes made to my practice are <b>proven</b> strategies based on sound research and the SoR.
	, 13	I am <b>reflecting on my own practice</b> in relation to the SoR.	I can <b>talk about</b> how the changes I am making to my practice are based on the SoR and the <b>GROW Literacy tools</b> (e.g. GROW Literacy Scope and Sequence).	I can justify the improvements I am making to my practice in reference to <b>SoR theories</b> .
	I am beginning	I am developing	I am effective	I have embedded practice

	Beginning	Developing	Effective	Embedded
Know my Ākonga	I try to find out most of my ākonga's  Likes and dislikes  Hobbies and interests  Prior knowledge  Past literacy experiences.	I create <b>opportunities</b> to get to know <b>most</b> of my ākonga's prior knowledge, <b>current literacy skills</b> , <b>strengths and next learning steps</b> .	I <b>plan</b> for and <b>explicitly</b> provide opportunities to find out more about <b>all</b> my ākonga's literacy strengths and next learning steps, as well as their <b>attitudes</b> to literacy and <b>learning preferences</b> .	I <b>regularly</b> use <b>deliberate</b> strategies and tasks to <b>understand</b> all my ākonga's literacy strengths and next learning steps, but also their <b>motivations, aspirations</b> and sense of learner agency.
	l am beginning	I am developing	I am effective	I have embedded practice
Know my Content	I don't yet understand what (i.e. the content) I should teach so as to reflect the Science of Learning (SoL) and the Science of Reading (SoR).	I am <b>starting</b> to build an understanding about the <b>essential literacy content</b> I need to teach so my programme <b>reflects</b> the SoR.	I have a <b>good understanding</b> about the literacy content I need to teach and how this is <b>supported</b> by the SoR.	I have a deep understanding of the literacy content that should be included in an effective structured literacy programme and how that content is supported by the SoR.  I keep up to date with new literacy research and ideas, so my content knowledge continues to grow.
	I am beginning	I am developing	I am effective	I have embedded practice
Planning	I am not yet familiar with the GROW Literacy Lesson Sequence or how to plan for a structured approach to literacy.	I am <b>starting</b> to use planning and teaching resources based on evidence, including the Science of Learning and Science of Reading.	My structured approach to literacy classroom programme is supported by quality planning and well considered resources.	My structured approach to literacy classroom programme is <b>informed</b> by the most recent <b>research</b> and supported with <b>responsive</b> planning and <b>proven</b> resources.
	I don't yet understand what the 'Gradual Release of Responsibility' is.	I sometimes plan for and incorporate a  Gradual Release of Responsibility into my literacy lessons (e.g. "I do it" → "We do it" → "You do it with others" → "You do it on your own").  My planning and teaching practice	I incorporate a Gradual Release of Responsibility into <b>all</b> my literacy lessons.  My planning and teaching practice	
		mostly reflects the GROW Literacy Lesson Sequence.	mostly reflects the Science of Learning, the Science of Reading and the GROW Literacy Lesson Sequence.	
	I am beginning	I am developing	I am effective	I have embedded practice

	Beginning	Developing	Effective	Embedded
Explicit Teaching	I am unsure what 'explicit teaching' is and what it looks like and sounds like in a lesson.	The <b>elements</b> of explicit teaching within the <b>GROW Literacy Lesson Sequence</b> are helping me to understand what explicit teaching is.	The elements of explicit teaching within the GROW Literacy Lesson Sequence are <b>evident</b> in <b>most</b> of my literacy planning and lessons.	I <b>always</b> plan for and <b>effectively employ</b> explicit instruction in <b>all</b> my literacy lessons, and this is <b>confirmed</b> by my colleagues or PLD facilitator.
		I am <b>starting</b> to plan for and include <b>some</b> explicit teaching strategies in <b>some</b> of my literacy lessons.		
	I am yet to use explicit teaching strategies that support a structured approach to literacy or reflect the Science of Learning. approach to literacy or reflect the Science of Learning.	I am <b>starting</b> to build a <b>kete of teaching strategies</b> and activities that mostly <b>support</b> a structured approach to literacy and <b>reflect</b> the Science of Learning.	I have a kete of explicit teaching strategies and activities that I use in my classroom, and I can describe how they support a structured approach to literacy and reflect the Science of Learning.	I have a kete of <b>proven</b> explicit teaching strategies and activities that support a structured approach to literacy and reflect the Science of Learning. Through PLD and sharing my practice with others, I am <b>reflecting</b> on my impact, <b>adding</b> to my kete of strategies and <b>improving</b> my practice.
	I am beginning	I am developing	I am effective	I have embedded practice
Teacher Modelling	I am unsure what 'teacher modelling' is and what it looks like and sounds like in a lesson.	The elements of teacher modelling within the <b>GROW Literacy Lesson Sequence</b> are helping me to understand what teacher modelling is (the "I do it"). I am starting to <b>plan for</b> and include <b>some</b> teacher modelling in <b>some</b> of my literacy lessons.	The elements of teacher modelling within the GROW Literacy Lesson Sequence are <b>evident</b> in <b>most</b> of my literacy planning and lessons.	I <b>always</b> plan for and <b>effectively employ</b> teacher modelling in <b>all</b> my literacy lessons and this is <b>confirmed</b> by my colleagues or PLD facilitator.
	I am yet to use teacher modelling strategies that support a structured approach to literacy or reflect the Science of Learning.	I am <b>starting</b> to build a <b>kete</b> of teacher modelling <b>strategies</b> (e.g. think alouds) and <b>tools</b> (e.g. modelling books) that <b>mostly support</b> a structured approach to literacy and <b>reflect</b> the Science of Learning.	I have a kete of teacher modelling strategies and tools that I use in my classroom and I can describe how they support a structured approach to literacy and reflect the Science of Learning.	I have a kete of <b>proven</b> teacher modelling strategies and tools that support a structured approach to literacy and reflect the Science of Learning. Through PLD and sharing my practice with others I am <b>reflecting</b> on my impact, <b>adding</b> to my kete of strategies and improving my practice.
	I am beginning	I am developing	I am effective	I have embedded practice

	Beginning	Developing	Effective	Embedded
Guided Practice	I am unsure what 'guided practice' is and what it looks like and sounds like in a lesson	I am starting to <b>build</b> an <b>understanding</b> of the importance of guided practice and <b>my role</b> in it.	I understand that guided practice is essential to learning and how it supports ākonga learn. I understand how to make guided practice more impactful (i.e the spacing effect and interleaving).	I <b>always</b> plan for and <b>effectively employ</b> guided practice in <b>all</b> my literacy lessons, and this is <b>confirmed</b> by my colleagues or PLD facilitator.
		I am starting to <b>plan</b> for and include <b>opportunities</b> for guided practice in <b>some</b> of my literacy lessons (the "We do it").	I am planning for and providing opportunities for guided practice in my literacy lessons and I am starting to monitor its impact (e.g. check for understanding and errors).	I have a kete of <b>proven</b> guided practice strategies and tools that support a structured approach to literacy and reflect the Science of Learning, including the use of the spacing effect and interleaving.
	I am yet to use guided practice to support my structured approach to literacy or reflect the Science of Learning.	I am starting to use scaffolds and prompts to support ākonga to build independence. I am starting to build a kete of guided practice strategies and tools	I have a kete of strategies and tools that support ākonga to build independence and I can describe how they support a structured approach to literacy and reflect the Science of Learning.	Through PLD and sharing my teaching practice with others I am <b>reflecting</b> on my impact, <b>adding</b> to my kete of strategies and <b>improving</b> my implementation of guided practice.
	I am beginning	I am developing	I am effective	I have embedded practice
Independent Practice	I am unsure what 'independent practice' is and what it looks like and sounds like in a lesson.	I am starting to <b>build</b> an <b>understanding</b> of the importance of independent practice and <b>my role</b> in it.	I understand that independent practice is essential to learning and I understand how it supports ākonga learn. I understand how to make independent practice more impactful (i.e. the spacing effect and interleaving).	I <b>always</b> plan for and <b>effectively employ</b> independent practice in <b>all</b> my literacy lessons, and this is <b>confirmed</b> by my colleagues or PLD facilitator.
	I am yet to use independent practice to support my structured approach to literacy or reflect the Science of Learning.	I am starting to <b>plan</b> for and include <b>opportunities</b> for independent practice in some of my literacy lessons (the "You do it with others" → "You do it on your own").  The opportunities I provide for independent practice directly <b>support</b> the skills ākonga can do, <b>reinforce new learning</b> and involve ākonga practicing with <b>less prompts and scaffolds.</b>	I am planning for and providing opportunities for independent practice in my literacy lessons, and I am starting to monitor its impact (e.g. check for understanding and errors).	I have a kete of <b>proven</b> independent practice strategies and tools that support a structured approach to literacy and reflect the Science of Learning, including the use of the spacing effect and interleaving.
		The opportunities I provide for independent practice involve ākonga practicing with <b>fewer prompts and scaffolds.</b>	The opportunities I provide for independent practice involve ākonga practicing with <b>no prompts and scaffolds.</b>	Through PLD and sharing my teaching practice with others I am <b>reflecting</b> on my impact, <b>adding</b> to my kete of practice and <b>improving</b> my implementation of independent practice.
	I am beginning	I am developing	I am effective	I have embedded practice

	Beginning	Developing	Effective	Embedded
Check Understandings & Provide Feedback	I am unsure what effective feedback looks like and sounds like in a literacy lesson.	I am starting to include <b>opportunities</b> to <b>check understandings</b> and provide <b>feedback</b> in <b>some</b> of my literacy lessons so that I am sure learning is occurring (i.e. corrective feedback e.g. highlighting the error, giving the correct answer).	I understand that teacher checking and feedback are essential to learning, and I understand how they support ākonga learn. I plan how I will check understandings and provide feedback in my literacy lessons.  I ensure feedback is received, understood and used by ākonga.	I <b>always</b> plan for and <b>effectively</b> use checking strategies and feedback (including feed forward) in <b>all</b> my literacy lessons and this is <b>confirmed</b> by my colleagues or PLD facilitator.
	I am unsure about how monitoring and feedback supports a structured approach to literacy or reflects the Science of Learning.	I am <b>starting</b> to build a <b>kete</b> of checking and feedback <b>strategies</b> (e.g. self checking/self assessment) and tools (e.g. "two stars and a wish") that mostly support a structured approach to literacy and reflect the Science of Learning.	I <b>use</b> my kete of checking and feedback strategies/tools to <b>further</b> ākonga learning.	I have a kete of <b>proven</b> monitoring and feedback strategies and tools that support a structured approach to literacy and reflect the Science of Learning.  Through PLD and sharing my teaching practice with others I am <b>reflecting</b> on my impact, <b>adding</b> to my kete of strategies and <b>improving</b> how I check that learning is occurring and how I give feedback and feed-forward.
	I am beginning	I am developing	I am effective	I have embedded practice
Diagnostic Assessment	I am yet to learn how to administer literacy diagnostic assessments and I don't yet understand the purpose of this data.	I am starting to <b>build an understanding</b> about the importance of diagnostic data.	I have a <b>good understanding</b> of the importance of diagnostic data.  I am <b>becoming more confident</b> in administering diagnostic assessments.	I have a strong understanding of the process, purpose and value of literacy diagnostic assessment  I can review data and moderate data confidently with my colleagues.
		I have <b>begun to administe</b> r diagnostic assessments.  With <b>support</b> , I can <b>review</b> the data from diagnostic assessments.	I take part in a <b>moderation</b> process and I am <b>starting to use</b> diagnostic assessments to <b>make changes</b> to my planning and delivery of literacy learning.	I regularly use diagnostic data to make changes to my teaching practice.
	I am beginning	I am developing	I am effective	I have embedded practice

	Beginning	Developing	Effective	Embedded
Formative Assessment	I am yet to learn how to gather and respond to formative data.	I am starting to <b>build an understanding</b> about the importance of formative assessment information.  I have <b>begun</b> to gather formative evidence about my ākonga's literacy skills and knowledge.	I have a <b>good understanding</b> about the importance of formative assessment.  I am <b>becoming more confident</b> in collecting formative evidence through everyday literacy tasks and/or opportunities.	I have a strong understanding of the process, purpose and value of literacy formative assessment.  I regularly use formative assessment evidence to make changes to my teaching practice.
		With support, I can review the evidence I am gathering from formative tasks or opportunities.	I am <b>starting to use</b> formative evidence to make changes to my planning and delivery of literacy learning.	I keep excellent <b>records</b> of my formative evaluations and <b>reflect</b> on these <b>regularly.</b>
	I am beginning	I am developing	I am effective	I have embedded practice
Achievement & Progress	I do not know where individual ākonga are 'at' in literacy and I don't yet know how to identify 'at risk' ākonga or how to support them.	I know where <b>most</b> of my ākonga are at in literacy and I know how to <b>identify potential</b> 'at risk' ākonga who require extra support.	I know the current level of literacy achievement for all my ākonga and I can describe how they are progressing.  I have used this information to identify my most 'at risk' ākonga and I have started to plan the extra support or interventions they require.	I know the current level of achievement and progress for all my ākonga and I can describe their <b>next learning steps</b> in detail.  I can <b>name</b> my 'at risk' ākonga and I am underway with <b>implementing a detailed plan</b> for the interventions they require.
	I am beginning	I am developing	I am effective	I have embedded practice
